

## From Single unit to Complete Formulation R&D Plant

Save 30-50%  
on total investment

ProCepT introduces its new way of thinking throughout its entire product range. Our product matrix allows customers to combine multiple processing units with a single central control system, central air handling and auxiliary equipment like liquid and gas dosing tools. The modular design offers an attractive and very cost effective solutions for our customers. Keep in mind that process modules can always be added at a later point in time if needed. Create extra flexibility and lab space through endless combinations of wall integration, trolley operation or bench top installation with or without containment isolators.

The unique design makes a 'disposable' process section possible for Clinical Trials or High Toxic applications.

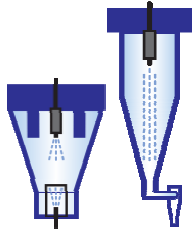

## PACKAGE DEALS !!

### Formulation R&D Plants

#### ➤ Encapsulation & Drying Suite

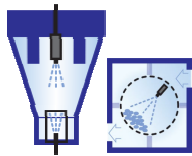

Including:

- ✓ Fluid Bed (Dryer / Agglomerator / Coater) & Spray Dryer
- ✓ Water processing
- ✓ Integrated liquid & gas dosing system "Make-IT-EZ"
- ✓ Excel PC control system with touch screen & data acquisition in real-time and reporting in excel of all process data
- ✓ Spray Dryer floor standing and Fluid Bed bench mounted
- ✓ OPTIONS; solvent processing, trolley mounting,...

#### ➤ Coating Suite

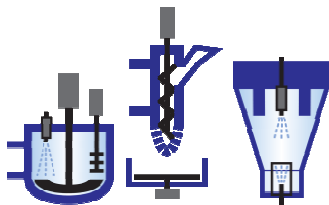

Including:

- ✓ Fluid Bed (Dryer / Coater) & PanCoater
- ✓ Water processing
- ✓ Integrated liquid & gas dosing system "Make-IT-EZ"
- ✓ Excel PC control system with touch screen & data acquisition in real-time and reporting in excel of all process data
- ✓ Both units bench mounted
- ✓ OPTIONS; solvent processing, trolley mounting,...

#### ➤ Agglomeration Suite

Including:

- ✓ Fluid Bed (Dryer / Agglomerator) & Granulator & Extruder
- ✓ Water processing
- ✓ Integrated liquid & gas dosing system "Make-IT-EZ"
- ✓ Excel PC control system with touch screen & data acquisition in real-time and reporting in excel of all process data
- ✓ All 3 units bench mounted
- ✓ OPTIONS; solvent processing, trolley mounting,...
